Email: [reception@vantageautomotive.com](mailto:reception@vantageautomotive.com)

ABN: 48 111 030 623  
RTO Provider Number: 91034

## Automotive Technical Apprenticeship

**Are you a problem solver?**

**Are you interested in new technologies?**

The level of technology within the vehicles of today is becoming so advanced that the average mechanic can no longer survive in the market place without significant upskilling, and that's where you come in!

As an Apprentice with Vantage Automotive you will embark on a journey to challenge your perceptions and develop your skills and knowledge to an exceptionally high level.

All Apprentices are employed and working within one of our partner branded dealerships for a period of up to 4 years, this generally leads to permanent full time employment after successful completion of the Apprenticeship.

The Apprenticeship comprises of on-the-job and off-the-job training covering a range of topics from basic service to advance diagnostics.

Off-the-job training will take place at our Centre of Excellence. Within it's dedicated workshops and classrooms you will find an immersive environment where you will become part of the manufacturer's brand. You will be working with the latest technologies and the latest equipment on modern vehicles. This will consist of 24 weeks of block training spread across 3 years.

## Automotive Parts Apprenticeship

**Are you a people person?**

**Are you a numbers person?**

Maybe the Parts Apprenticeship is the route for you!

Although this is a different specialism within the automotive sector the same outcomes remain.

All Apprentices are employed and working within one of our partner employers for a period of up to 3 years. This generally leads to permanent full time employment after successful completion of the Apprenticeship.

The Parts Apprenticeship Program develops Parts Interpreters to understand every facet of the automotive parts business with focus on stock management, customer service & sales/marketing.

On-the-job training will be conducted within the workplace, an environment that requires and continually develops high levels of customer service.

Off-the-job training will be in a number of environments which consist of a simulated parts department (complete with front counter, back counter & warehouse), classroom & workshop. This will consist of targeted training spread across 2 years.

## Automotive Body Repair Apprenticeship

**Do you have an eye for detail?**

**Maybe your passions lie in body repair?**

This is an area of the automotive sector that not only focuses upon bringing vehicles back to their original state, but can also allow for artistic talents to shine through.

As with the previous Apprenticeships, the duration is up to 4 years with an employer, leading to full time employment on successful completion.

Body Repair Apprentices are involved in all aspects of repair from routine cosmetic damage, complete panel replacement through to structural repairs.

Also included is composite material repair using the latest welding equipment, as this now forms part of the everyday routine in automotive repair.

Artistic talent can become part of this opportunity as body repair dealerships engage in body modifications such as body kits, spoilers etc.

Off-the-job training will be in a number of environments which consist of a dedicated bodyshop and classrooms. This will consist of 17 weeks of block training spread across 3 years.

## The Centre of Excellence

A state of the art facility to keep at the forefront of progression.

The Vantage Automotive "Centre of Excellence" is situated in Lidcombe NSW, approximately 30km from Sydney's CBD.

The Centre of Excellence offers a host of training environments that range from fully equipped audio/visual delivery rooms to state of the art simulated automotive workshop environments.

Vantage Automotive cater for Technical and Non-Technical training scenarios as well as meetings and conferences of various sizes.

Facilities include:

- 6 fully equipped and networked automotive workshops
- 23 training rooms equipped with audio visual and networked PCs (can be configured to accommodate groups from 10 - 40 people)
- Secure parking facilities
- Extensive event catering options
- 50 person breakout room plus outdoor seating area

## Introduction to Vantage Automotive

The Australian automotive industry is a diverse, dynamic and constantly evolving sector which demands a highly-skilled and flexible workforce.

Vantage Automotive is a major provider of government funded vocational learning and outsourced services to leading vehicle manufacturers with an extensive client list across Australia.

Established as a nationally Registered Training Organisation (RTO) in 2004, Vantage Automotive consistently achieves success across the Asia Pacific region by delivering highly valued management consultancy products and services to their clients. Vantage Automotive's leading team of highly qualified consultants aim to identify, develop and deliver specifically targeted and tailored solutions for their clients.

Vantage Automotive uses customised tools and multiple delivery channels to develop and deliver strategic and practical solutions for clients.

Vantage Automotive enjoys a reputation for achieving results through identifying, developing and delivering creative, practical and implementable solutions for their clients. As a Registered Training Organisation, Vantage Automotive is capable of delivering and assessing nationally accredited training.

Vantage Automotive's Mission:
